Assessment Principles

- Assessments are valid (they test the knowledge and skills that they are supposed to) and reliable (they are a trustworthy gauge of a student's attainment);

- Summative assessments are criterion-based and use valid rubrics; they are marked by a student's subject teacher, with samples are moderated by colleagues within the department to ensure accuracy;
- Attainment grades are evidence-based, informed by summative assessments; and utilising a 'Best Fit' approach;
- While the MEG represents a figure against which progress can be calculated, it is not the target set for a student. The MEG is, by definition, the minimum expectation for a grade or score that the student should achieve. Teachers should feel confident defining even more ambitious targets for their students, and support them with quality teaching, timely feedback and personalised interventions to help every child achieve their very best.

Middle Years Programme

Levels of data

- Level 1: granular, criterion- or question-specific data that teachers record and use to inform their lessons and provide personalised feedback to students. Teachers use rubrics with level descriptors for each criterion to assess student work.
- Level 2: holistic assessment data that links to criterion and that is recorded in departmental trackers or ManageBac. Each of the eight MYP subject groups has four subject-specific assessment criteria, typically labelled A, B, C, and D. Used to inform class-, department- or grade level-specific interventions.
- Level 3: data entered into ISAMS for specific Assessment Points (APs 1-5) or high-validity examinations (e.g. mock examinations). Used by the school to judge attainment and progress, and to identify strategic improvement priorities.

Internal Attainment

The school calculates Level 3 attainment using the MYP framework and a 'best fit' principle, utilising recent Level 2 data.

Criterion Points Total (/32)	IB MYP Grade	Notes
28-32	7	
24-27	6	
19-23	5	This is the KHDA exceeding curriculum expectations grade
15-18	4	This is the KHDA meeting curriculum expectations grade

10-14	3	Any child at this level or below should be receiving intervention to help them achieve at least a Grade 4.
6-9	2	
1-5	1	

The school judges **attainment** following the KHDA framework for school inspection, using the AP5 data point:

Judgment	% of grades at 4 or above	% of grades at 5 or above
Outstanding	75	75
Very Good	75	61
Good	75	50
Acceptable	75	

Internal Progress

The school only tracks progress through Level 3 data. It does so by comparing AP5 data (the final data point for an academic year) with the AP5 data for the previous year.

The school calculates progress as follows:

Descriptor	Definition	Example
Above expected progress (1)	One or more MYP points (/32) per academic year.	2024-2025 = 24 points 2025-2026 = 25 points
Above expected progress (2)	Any student with an MYP Grade of 7, who remains there ('Everest principle').	2024-2025 = 29 points 2025-2026 = 28 points
Expected progress	The same MYP points as the previous year.	2024-2025 = 24 points 2025-2026 = 24 points
Below expected progress	Less MYP points than the previous year (excluding anyone remaining at MYP Grade 7 – see above).	2024-2025 = 24 points 2025-2026 = 23 points

CAT4, MEG and target columns

There are three columns to the target section of ISAMS and this is the school's AP1. Minimum Expected Grade (MEG) and CAT4 'if challenged' grade are calculated automatically:

CAT4 'if challenged' grade

These ambitious grades are subject-specific and in some cases, are derived using a proxy subject (see below; for example, there is no CAT4 expected grade for Design, so the target for IB MYP Technology is used):

<i>Subject</i>	<i>Target draws from CAT4 'If challenged' for...</i>
Art	IB MYP Arts
Biology	IB MYP Sciences
I&S Commerce	IB MYP Humanities
Chemistry	IB MYP Sciences
Design	IB MYP Technology
Drama	IB MYP Arts
English LL	IB MYP English
English as additional Language	IB MYP English
French LA	IB MYP French
French LL	IB MYP French
German LA	IB MYP German
German LL	IB MYP German
I&S (English, French or German)	IB MYP Humanities
Information Technology	IB MYP Technology
Mathematics	IB MYP Mathematics
Music	IB MYP Arts
Physics	IB MYP Sciences
PHE/PHP	IB MYP Physical Education
Science (Integrated, Double)	IB MYP Sciences
Spanish LA	IB MYP Spanish
Visual Arts	IB MYP Arts

Minimum expected grade

For returning students, this is the previous year's AP5 Cumulative Points Total CPT (/32) +1. For instance, a student who achieved 24/32 at the end of Grade 8, would then have a MEG of 25 at the start of Grade 9.

For new students, the MEG is derived from the CAT4 'if challenged' grade and set at the lowest equivalent points /32 for that grade. For example, if a new student has a CAT4 'if challenged grade' of 6, then the MEG will be set at 24. This is applied to **all** G6 students as they are new to the secondary school. If a student does not have a CAT4 grade (this is only in rare cases) then the MEG is set at the equivalent points to an MYP grade of 4.

Target Grade

The current system should prevent the need for the target column to be completed. However, in AY2025-26, as the system is new, the column has been kept in case a target grade has to be given to a student manually (for instance, for new students joining after AP2).

Target setting for students

While the MEG represents a figure against which progress can be calculated, it is not the target set for a student. The MEG is, by definition, the minimum expectation for a grade or score that the student should achieve. Teachers should feel confident defining even more ambitious targets for their students, and support them with quality teaching, timely feedback and personalised interventions to help every child achieve their very best.

The MYP Gradebook

Gradebook Cycles

Cycle	Date open	Date closed
Assessment Point 1 (targets)	Automatically inputted MEG and CAT4 'if challenged' grade. Same open/close dates as AP2.	
AP2	10/11/2025	17/11/2025
AP3 Includes G10 mock exam data	09/01/2026	23/01/2026
AP4 Excluding G12	10/04/2026	20/04/2026
AP5 Full written report	11/05/2026	04/06/2026

Teachers input academic data for APs 2-5. For AP2 and AP4, scores for only two criteria are entered and therefore the overall MYP grade will not be shown. For APs 3 and 5, scores for all four criteria must be entered and the MYP Grade is shown.

For AP3, the first reporting point, the attainment levels for the four criteria (each out of 8) are added to get a total score out of 32. This total score is then converted to a final MYP grade (1–7) using the IB grade boundaries.

For AP5, the final reporting point, the attainment levels for the four criteria (each out of 8) are added to get a total score out of 32. At this stage, teachers use a 'Best Fit' approach by considering all work throughout the year before entering the four criteria scores.

Teachers also input [Approaches to Learning](#) and [Attitude to Learning](#) scores into the Gradebook (AP3 and AP5).

AP3 Double and Triple Science Grade 9 and 10

MYP assessments are scheduled according to an assessment calendar, to manage workload for students. Therefore, students taking Triple or Double Science may not have been summatively assessed on all four criteria by the AP3 summative point for a particular discipline. Therefore, where a criterion has not been assessed summatively for one science discipline, teachers use the criterion score for another discipline.

Grade 10 examinations

Grade 10 have two other assessment points, the mock examinations in November and the final exam grade in May/June. Both are recorded separately on ISAMS for data analysis. In addition, the final examination contributes 75% of the final grade awarded to the student in their end of year report, with teacher judgment, using a 'Best Fit' approach, constituting 25%.

Grade 10 Double and Triple Science Examinations

Students are examined on each of the 2-3 science disciplines, and these results (Criteria A-D) are then averaged to provide a unified score for science that is inputted into the Gradebook.

Students joining school close to or after AP2/who miss assessments

If students join school after AP2, or if they miss assessments, then teachers should also use any previous summative, formative or in-class work to form a judgment for each criterion for the current AP. Teachers do not need to complete any previous AP data. They may access CAT4 data to inform their judgment, through the [Class context sheet](#) or by requesting full CAT4 data for the new student from the Deputy Headteacher – Academics.

If a student has joined so soon before an AP that teachers cannot form any judgment, they should input N/A into each of the four criterion columns for that AP only. They should also not attempt to set a target for that student until they have sufficient data/evidence to do so.

Calculating attainment

- Each of the four criterion (A, B, C and D) is assessed on a scale of 0 to 8, based on the MYP subject-specific rubrics.
- The Cumulative Point Total (CPT) for an assessment point is calculated by summing the four criteria scores, giving a total out of 32.
- Based on the CPT, ISAMS automatically determines the IB Grade (1–7) according to the MYP grade boundary conversion chart

Criterion Points Total (/32)	IB MYP Grade	Descriptor
28-32	7	Excellent quality; comprehensive understanding and consistent application of critical and creative thinking.
24-27	6	High quality; extensive understanding and frequent demonstration of critical and creative thinking.
19-23	5	Generally high quality; secure understanding and some sophistication in critical and creative thinking.
15-18	4	Good quality; mostly accurate understanding; demonstrates some critical and creative thinking.

10-14	3	Acceptable quality; basic understanding with some errors; limited application of knowledge and skills.
6-9	2	Limited quality; significant gaps in understanding and infrequent critical or creative thinking.
1-5	1	Work of very limited quality; shows major misunderstandings and minimal critical or creative thinking.

Diploma Programme

Levels of data

- Level 1: Question- or criterion-specific data that teachers record and use to inform lessons and provide personalised feedback to students. Teachers use IB markschemes and grade descriptors to assess student work.
- Level 2: Subject-level holistic data that reflects performance across IB assessment objectives. This data is recorded on ManageBac Gradebooks and used to inform class-, department-, or grade-level interventions
- Level 3: Data entered into ISAMS for specific Assessment Points (AP2–AP5) or high-validity assessments (e.g. mock examinations). Used by the school to monitor attainment, progress, and target achievement. Data needs to be entered into ManageBac gradebooks for a consistent approach so that parents and students can access the data.

Internal Attainment

Each DP subject conducts three summative assessments per term across DP1 and DP2. Summative assessments are marked using DP rubrics and grades awarded using the most recent IB Diploma Programme grade boundaries plus 5% - 7% additional (at the discretion of the SubCo) where assessments are less synoptic. The most recent grade boundaries are used for all formal examination series such as welcome back examinations and mock examinations.

Teachers assign levels 1–7 for student attainment, applying the 'Best Fit' principle across criteria and assessment components. All summative assessments are recorded in the ISAMS Gradebook and ManageBac Gradebook, ensuring transparency and consistency.

Assessment Points AP2 to AP5 reflect cumulative student attainment, combining summative results with teacher professional judgment.

The school judges **attainment** following the KHDA framework for school inspection, using the AP5 data point:

Judgment	% of grades at 4 or above	% of grades at 5 or above
Outstanding	75	75
Very Good	75	61
Good	75	50
Acceptable	75	

CAT4, CEM and MEG columns

There are several columns for G11 and G12 gradebooks for DP. All are calculated automatically.

DP1/Grade 11

The Centre for Evaluation and Monitoring (CEM) test is the standard test used to determine projected grades. The MEG is equivalent to the CEM test projected grade for that subject. If the CEM test has not been completed, then the MEG is set at the CAT4 'If Challenged' grade for that subject in either HL or SL, depending on the students' subject choice.

DP2/Grade 12

The AP grades from Grade 11 are provided and the MEG is automatically set as the AP5 cumulative grade from DP1 or AP5 +1, depending on student progress and teacher judgment.

Teachers review the MEG during AP1 and can recommend adjustments based on current evidence. Any changes must be reviewed by the Subject Coordinator (SubCo) and approved by the SLT as part of the quality assurance process.

The DP gradebook

Gradebook cycles

Cycle	Date open	Date closed
Assessment Point 1 (targets)	Automatically inputted MEG, CEM and CAT4 'if challenged' grade. Same open/close dates as AP2.	
AP2	10/11/2025	17/11/2025
AP3	09/01/2026	23/01/2026
AP4 G12	08/05/2026	15/05/2026
AP5 Full written report G11	11/05/2026	04/06/2026

Teachers input academic data for APs 2-5:

- AP2: summative and 'Welcome back' results and cumulative grade

- AP3: summative results and cumulative grade; mock examinations for G12
- AP4: summative results and predicted grade; final AP for G12
- AP5: final summative grades and teacher judgement

Teachers also input [Approaches to Learning](#) and [Attitude to Learning](#) scores into the Gradebook (AP3 and AP5).

DP Core

There are separate gradebooks for the DP Core. CEM and CAT4 data produce MEGs utilising the A-E scale. Teachers input grades for both TOK and the EE.

In Grade 11, teachers input a single grade on the A-E scale for each term (AP2, AP3 and AP4). In Grade 12, Term 1 changes to include separate grades for the TOK Exhibition, TOK Essay, and Extended Essay as well as the overall AP2 grade.

Careers-related Programme

Levels of data

- Level 1: Question- or criterion-specific data that teachers record and use to inform lessons and provide personalised feedback to students. Teachers use IB and BTEC markschemes and grade descriptors to assess student work.
- Level 2: Subject-level holistic data that reflects performance across IB and BTEC assessment objectives. This data is recorded on ManageBac Gradebooks and used to inform class-, department-, or grade-level interventions
- Level 3: Data entered into ISAMS for specific Assessment Points (AP2–AP5), ongoing BTEC units, or high-validity assessments (e.g. mock examinations). Used by the school to monitor attainment, progress, and target achievement. Data needs to be entered into ManageBac gradebooks for a consistent approach so that parents and students can access the data.

The CP gradebook

Gradebook cycles

Cycle	Date open	Date closed
Assessment Point 1 (targets)	Automatically inputted MEG, CEM and CAT4 'if challenged' grade for DP courses. Same open/close dates as AP2.	

AP2	10/11/2025	17/11/2025
AP3	09/01/2026	24/01/2026
AP4 G12	09/05/2026	15/05/2026
AP5 Full written report G11	11/05/2026	04/06/2026

BTEC

BTEC courses are modular and unit-based, with each unit being broken down into three components. Teachers input the grade for each component (U – ungraded; Pass, Merit and Distinction) utilising the Pearson mark schemes to make an initial judgment which is then further refined through moderation. They then make an overall judgement for the unit using the same four grade options above. This is an ongoing process and, as a result, BTEC gradebooks remain open all year through.

At each Assessment Point, teachers use the component and unit grades to input an overall grade for that AP.

CP Core

For each of the APs, teachers input either 'On track' or 'Not on track' for each of the CP Core components – Personal and Professional Skills, Language and Culture Studies, and Community Engagement.

Quality assurance of data

QA of gradebook data

This excludes ongoing QA of data through moderation and data checking on ManageBac.

Role/person	Responsibility(ies)	APs
Shanif	Check for grades that are lower than the previous AP > alert SubCo	AP3-5
Shanif	Check attainment versus KHDA framework > inform Deputy Headteacher, Academics	AP3 and AP5
SubCos	Check for missing data (obtain spreadsheet from Shanif) and chase up teachers, providing two days to rectify	All APs
Teachers	Coordinated by SubCo, peer check inputted data and query with partner > alert SubCo if any issues	AP3 and AP5
Assistant Head, Student Experience	Checking all Emirati student data > alert Deputy Headteacher, Academics if any Emirati student is in danger of failing to meet thanaweya.	AP3 and AP5
DP Coordinator	Review of predicted grades and ensure DP alignment.	AP4 and AP5

CP Coordinator	Checking of Component and Unit grades against school targets.	All APs
Inclusion team	Spot checking of Inclusion student data > discuss findings with Deputy Headteacher, Academics.	AP3 and AP5
MAGT Coordinator	Spot checking of MAGT student data > discuss findings with Deputy Headteacher, Academics.	AP3 and AP5
Head of Upper School	Checking of cumulative grades and predicted grades in consultation with DP and CP Coordinators.	AP3-AP5
SLT	Final spot checks based on earlier QA.	AP3 and AP5

QA of comment banks

Role/person	Responsibility(ies)	APs
Jill, GLCs and Assistant GLCs	Read, amend and test comment banks for tutor comments > inform Shanif when satisfied	AP3
Dan, SubCos and Assistant SubCos	Read, amend and test comment banks for teacher comments > inform Shanif when satisfied	AP5

QA of reports

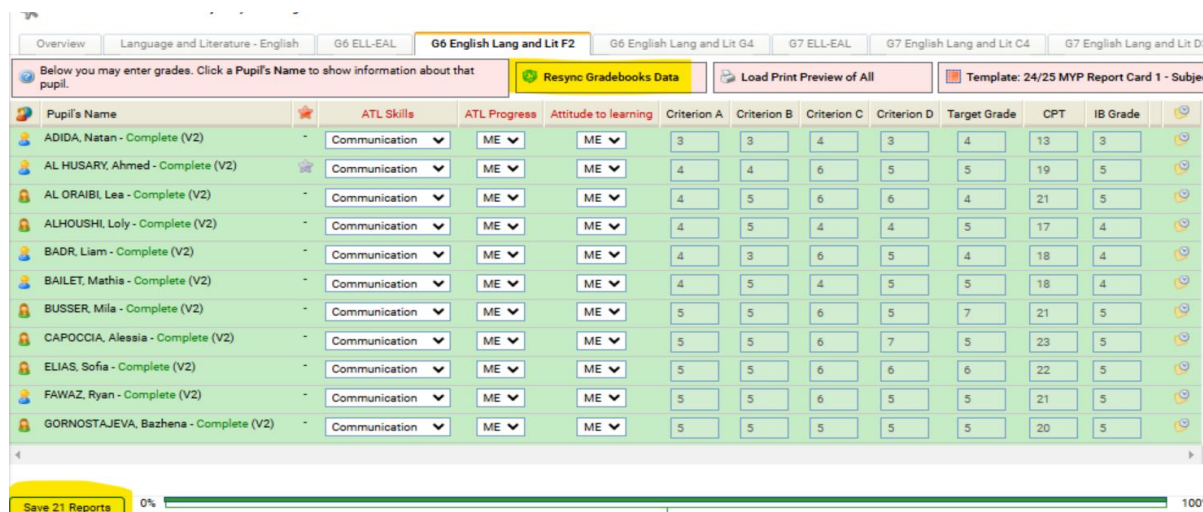

Role/person	Responsibility(ies)	APs
GLCs and Assistant GLCs	Read tutor comments > alert Homeroom Tutors of required changes > inform Jill when complete	AP3
Jill	Spot check of tutor comments post-GLC check > inform GLCs of any issues > Shanif when reports ready to go	AP3
SLT, SubCos and Assistant SubCos	Read full reports for a Homeroom > alert SubCos of required changes > inform Shanif when reports ready to go - SLT – Two full classes each - SubCos /Assistant SubCos – one full class each	AP5

The Online Assessment System

The OAS is where all data and written comments for reports are submitted.

Teacher roles

For AP3, teachers need to visit each of their classes and synchronize the data on OAS with Gradebook (click 'Resync Gradebook Data'). This needs to happen every time a teacher changes a grade on Gradebook.

Pupil's Name	ATL Skills	ATL Progress	Attitude to learning	Criterion A	Criterion B	Criterion C	Criterion D	Target Grade	CPT	IB Grade
ADIDA, Natan - Complete (V2)	Communication	ME	ME	3	3	4	3	4	13	3
AL HUSARY, Ahmed - Complete (V2)	Communication	ME	ME	4	4	6	5	5	19	5
AL ORAIBI, Lea - Complete (V2)	Communication	ME	ME	4	5	6	6	4	21	5
ALHOUSHI, Loly - Complete (V2)	Communication	ME	ME	4	5	4	4	5	17	4
BADR, Liam - Complete (V2)	Communication	ME	ME	4	3	6	5	4	18	4
BAILET, Mathis - Complete (V2)	Communication	ME	ME	4	5	4	5	5	18	4
BUSSER, Mila - Complete (V2)	Communication	ME	ME	5	5	6	5	7	21	5
CAPOCCIA, Alessia - Complete (V2)	Communication	ME	ME	5	5	6	7	5	23	5
ELIAS, Sofia - Complete (V2)	Communication	ME	ME	5	5	6	6	6	22	5
FAWAZ, Ryan - Complete (V2)	Communication	ME	ME	5	5	6	5	5	21	5
GORNOSTAJEVA, Bazhen - Complete (V2)	Communication	ME	ME	5	5	5	5	5	20	5

A Class list on OAS. Note the yellow highlighted buttons. Also note that this is the older version and the ATL columns are no longer there, having been replaced by a simple 'Yes' and 'No' validation of data dropdown menu.

When synchronized, the cells turn green. If a cell is not synchronized, the cell is yellow. For AP3, teachers then confirm that the data is synchronised correctly from Gradebook by selecting 'Yes' from the dropdown menu (not shown above). After, teachers need to press 'Save XX Reports'.

For AP5, teachers Resync Gradebook Data, upload the EOY subject comments from the Comment Generator spreadsheet (see [below](#)), and save the reports.

Language acquisition teachers also need to input one of three descriptors for their subject:

Emergent	Students can listen and read from generally simple contexts and texts and can speak and write clearly using simple devices.
Capable	Students can listen and read from more complex contexts and texts and can speak and write clearly using complex devices.
Proficient	Students can listen and read from complex contexts and texts and can speak and write clearly using wide ranging, complex devices.

Tutor roles

For AP3, tutors need to upload the AP3 tutor comments from the Comment Generator spreadsheet (see [below](#)).

They also need to input the student's status with their Service as Action work:

Concern	One or no Service as Action activities recorded on Managebac.
---------	---

On track	Two Service as Action activities recorded on Managebac, with some evidence.
Excellent	Two extended (lasting more than one day) Service as Action activities recorded on Managebac including comprehensive evidence.

For AP5, tutors only need to complete the Service as Action status box, and this time there are only two options:

Completed	Students have demonstrated learning in all seven Service as Action outcomes and have provided comprehensive evidence and reflections.
Not Completed	Students have not demonstrated learning in all seven Service as Action outcomes and/or have not provided comprehensive evidence and reflections.

OAS timeframes

Cycle	Date open	Date closed
Assessment Point 3	16/01/2026 (provisional)	24/01/2026
Assessment Point 4 (G12)	09/05/2026	15/05/2026
AP5	15/06/2026 (assumes teachers have correctly completed gradebook)	19/06/26

Approaches to Learning

For AP3 and AP5, the school uses a four-point scale to evaluate a student's Approaches to Learning:

Novice (N)	The student is introduced to the skill. They observe others performing it to understand what it looks like in practice.
Beginner (B)	The student begins to use the skill by imitating others. They still rely on scaffolding, modelling, and teacher guidance
Practitioner (P)	The student applies the skill confidently and effectively. They can use it independently in a range of contexts.
Expert (E)	The student has full command of the skill. They can model it for others and evaluate how effectively it is being used.

The IB Approaches to Learning Framework can be found [here](#). The skills consist of:

- Thinking skills
- Communication skills
- Social skills

- Self-management skills
- Research skills

SubCos will be contacted during the process of creating the comment generators for AP5, to provide the most appropriate ATL to be reported. The descriptions above help guide teachers towards making a judgment of a student's skill proficiency.

Attitude to Learning

The school uses a four-point scale to evaluate a student's Attitude to Learning:

Exceeding expectations (EE)	Consistently punctual Hardworking and participative in all lessons Completes home learning on time and with superb effort Well-behaved and mannered with teacher and peers
Meeting Expectations (ME)	Generally punctual Hardworking and participative in most lessons Completes home learning on time Well-behaved
Approaching Expectations (AE)	Sometimes late to lessons Inconsistent effort in lessons Completes most home learning Occasional negative behaviour in class
Below Expectations (BE)	Regularly late to lessons Usually lacks effort in lessons Often fails to complete home learning Regularly disrupts classes

Teachers select a 'Best Fit' approach for Attitude to Learning – for example, a student who is generally punctual (ME), has inconsistent effort (AE), completes most home learning (AE), and regularly disrupts class (BE) would be judged as Approaching Expectations as a best fit descriptor.

Comment Generator

For AP3 and AP5 report comments are generated using an Excel generator. For AP3 this is only for Homeroom Tutor comments; for AP5 it is for all subject comments.

AP3

Homeroom Tutors have to download the file and use the filter to select their homeroom class. All of their students will automatically populate the rows below, and the gender and house

point total for these students will automatically appear. Homeroom tutors then have to select the best fit descriptor for five categories:

- Character
- IB Learner Profile
- CAS/SAA
- ASA involvement
- Activity

Once this is done, a generated comment will appear in the respective cell.

Homeroom tutors then have to replace the word *Activity* with a real activity that the student has participated in (e.g. sports team, student councils, production). To do this, they can either copy and paste the comment directly into the Online Assessment System module on ISAMS, and then edit the word *Activity*, or edit first in the 'Editing Column' on the spreadsheet before copying and pasting into the Online Assessment System.

A short video guide of how to use the Homeroom Tutor comment generator is [here](#).

The folder containing the Homeroom Tutor comment generator is [here](#).

AP5

Comments are provided for all subjects studied by a student for AP5. The system is broadly similar to the one above except:

- The criteria grades, final grade, and ATL grade are automatically populated;
- From this, a strength and target is also automatically populated;
- As a result, a fully completed report is created ready to be copied and pasted into the Online Assessment System on ISAMS.

Elective Subject Comment Generator

- For elective subjects, teachers will use a dedicated comment.
- Teachers begin by selecting the relevant class, which automatically populates all students within that group.
- For each student, the teacher then selects three attributes that best describe the student's performance.
- Based on the selected attributes, the system automatically generates a personalised comment tailored to the individual student.

SubCos are responsible for reviewing and amending the comment banks that populate each student comment.

A short video on how to use the MYP comment generator is [here](#).

A folder containing the subject comment generators is [here](#).

The final report

An MYP AP3 report looks like [this](#) and a DP AP3 report looks like [this](#).

An MYP AP5 report looks like [this](#) and a DP AP5 report looks like [this](#).

A CP AP5 report (including BTEC grades) looks like [this](#).

Ministry of Education Subjects

MOE subjects (Arabic A, Arabic B, Islamic A, Islamic B, Social Studies for Arabic Students) subjects are assessed using a percentage score.

Arabic MYP

Arabic A (Language and Literature) and B (Language Acquisition) are similar in structure to other MYP courses within Groups 1 and 2. Therefore to provide consistency, teachers assess students using the same four MYP criteria and convert overall results (/32) to a percentage score using the following conversion table:

MYP Grade	Minimum MOE Grade
12	50
13	52
14	55
15	58
16	60
17	63
18	66
19	69
20	72
21	74
22	76
23	80
24	82
25	84
26	86
27	88
28	90

29	92
30	94
31	97
32	100

The only substantial difference in target setting concerns students who are new and therefore do not have a MEG derived from the previous year's CPT. Because there is no CAT4 generated 'if challenged' target, the MEG is automatically set at 15 (equivalent to a MYP score of 4).

Everything else remains the same as for other subjects.

Arabic DP

In the Diploma Programme (DP), both Arabic A: Language and Literature and Arabic B are assessed using the IB DP assessment criteria specific to each course. Students are evaluated through a combination of internal assessments (IAs) and external assessments (EAs).

For Arabic A, this includes tasks such as the Individual Oral and the Paper 1 and Paper 2 examinations that require critical analysis, interpretation, and the production of original written responses. For Arabic B, assessment focuses on receptive, productive, and interactive communication skills, demonstrated through the Individual Oral and written examination papers. Final grades are awarded on the IB 1–7 scale, based on the combined performance across internal and external assessments.

To ensure consistency and clarity in reporting student achievement across both the MYP and the DP, the school uses a standardized internal conversion scale when translating the DP final grade (1–7) into a percentage score.

It is important to note that this conversion is used **for school reporting purposes only and does not** replace or modify the official IB grade awarded to the student. The official IB grade remains the recognized outcome reported by the International Baccalaureate Organization.

This internal conversion allows teachers, students, and parents to better understand student progress in relation to local grading expectations and supports alignment with the Ministry of Education and KHDA reporting frameworks.

DP Grade	MOE Grade
1	40-
2	40-49%
3	50-59%

4	60-69%
5	70-79%
6	80-89%
7	90-100%

Other MOE subjects

There are three other mandatory subjects – Islamic Studies (A and B), Social Studies for Arab Students, and Moral, Social and Cultural Education (MSC). All are assessed following MOE guidelines: [Assessment Policy2025-2026-EN.pdf](#)

Target (at same time as AP2)

The MEG for returning students is the final percentage grade from the previous year +3%, which is equivalent to above-expected progress. New students will be automatically assigned a MEG of 60% as there is no CAT4 'If challenged' grade for these subjects.

Term 1 (at same time as AP3)

Accounts for 35% of the total subject grade, distributed as follows:

- 10% formative assessment (class activities, assignments, short performance tasks)
- 25% summative assessment (end-of-term exam)

Term 2 (at same time as AP4)

Accounts for 30% of the total subject grade, distributed in the same manner as Term 1:

- 10% formative assessment
- 20% summative assessment

Term 3 (at same time as AP5)

Accounts for 35% of the total subject grade, distributed as follows:

- 10% formative assessment
- 25% project-based assessment (a practical or research project evaluating deep understanding and research skills)

The final grade is calculated based on the cumulative performance across all three terms, and students must achieve the minimum passing requirement as defined by the Ministry of Education:

- Grades 6–8: A minimum of 50% is required to pass the subject
- Grade 9: A minimum of 60% is required to pass the subject

Curriculum standards judgments for MOE subjects

The school uses the following percentage thresholds to judge attainment against curriculum standards for MOE subjects:

- Meeting expectations G6-8: 54%
- Meeting expectations G9-12: 60%
- Above expectations: G6-12: 70%

If a student has not completed enough work for a judgment, then they are automatically given 50%.

FAQ

Why do some students appear locked (greyed out) in the gradebook?

Students who have left the school or moved to a different class will appear greyed out in the gradebook. This is a feature of iSAMS that ensures historical assessment data is preserved. A greyed-out student indicates that they are no longer active in the current class or school, but their records remain available for reference.
